---

OK. Based on no.'s 2 and 3, I made additional changes in redline in the attached draft.

Thanks Ed.

- 1) Looking into that
- 2) There are two creeks that adjoin on the southeastern corner of where the Wilcox Refinery was formerly located
- 3) There are none that I'm aware of

Hi Mark,

I'm attaching my comments in redline for your consideration. I included a bit more factual

9546805

background from our website:

<http://www.epa.gov/superfund/sites/npl/nar1882.htm>

Let me know what you think.

I also had a few questions.

- 1) Do we have a date as to when the Site was listed on the NPL?
- 2) Mention is made of one or two creeks on the eastern portion of the site. Is it just one creek or two different creeks?
- 3) I'm guessing there are no ARARs for capping with key access the abandoned drinking water well. Is that correct?

Ed,

I've decided to go with the time-critical AM. Please review and provide any edits/comments at your earliest.
